

Key Features

- Easy to Set Up
- Available on web, tablet and mobile
- Counter and Branch Details Configuration
- Pre-defined 15+ Reports and 60+ KPIs
- Health Check Monitoring
- Import Sales Data for comparison with Footfall System
- Account Management
- Email Scheduler
- Regular Backup
- Support Multi Language

Minimum Server Requirements	
Operating System	Window Server 2008 R2 and above
Storage	500GB to 1TB support up to 2000 Devices
Processor	3.1 GHz (64-bit Processor) with Multi-Core
Physical Memory	16 GB
Web Server	Internet Information System (IIS) 7.0 and above
Microsoft .NET Framework Version	4.0
Database	MS SQL Server 2016 and above

Software Specifications	
Interface	Http; Https
Compatible Browser	IE7 or Later Mozilla Firefox or Later Chrome Version 4.0 or Later Safari
User Levels	2 levels: Administrator, Standard User
Ethernet	10/100 Mb Ethernet
Time	NTP, Adjustable time zone, automatic day light saving adjustments
Data Delivery	TCP/IP
Database Type	SQLite
Report format	csv, .xml, .txt
Data Storage	5 Years storage with auto sync
Data Backup	Yes
Backup Frequency	Daily Full Backup for Data and Configuration File Weekly Backup to Sub Server for Contingency Purpose
Software Version Upgrade	Auto Upgrade

FootfallCam Analytic Manager V8™

Centralised Management Analytics Software

FootfallCam Analytic Manager V8™ is enterprise web-based control panel designed for customers who are managing large number of counters. It collects data from all counters and store them in a single place where user can carry out deep analytics. Analytic Manager V8™ provide the full analysis of traffic data for individual stores and across multiple store locations, region and the entire chain including:

- Visitor entering and exit at the entrance,
- Sales conversion, and
- Other Wi-Fi metrics like passerby, visit duration, returning customer and etc.

Pre-Defined Report Set

15+ pre-defined reporting set designed for different functional role e.g. Top management at headquarter, Marketing Manager, Operation Manager, Regional Manager or Store Manager. There are Company level report set which could provide the overall insight of the store performance in macro view, and store level report set which provide the further insight of the footfall pattern and shopper behavior in deep for any operational and marketing decision.

Health Check Report

A routine system health check is implemented, which check across the whole system to make sure all counters are connected and counting. This health check is usually scheduled to perform daily at a pre-defined time (e.g. 12am). An automated email alert will be sent to the person-in-charge detailing any faults found, making this a pro-active yet manageable approach to maintain all the counters across your retail chain

User Account Management

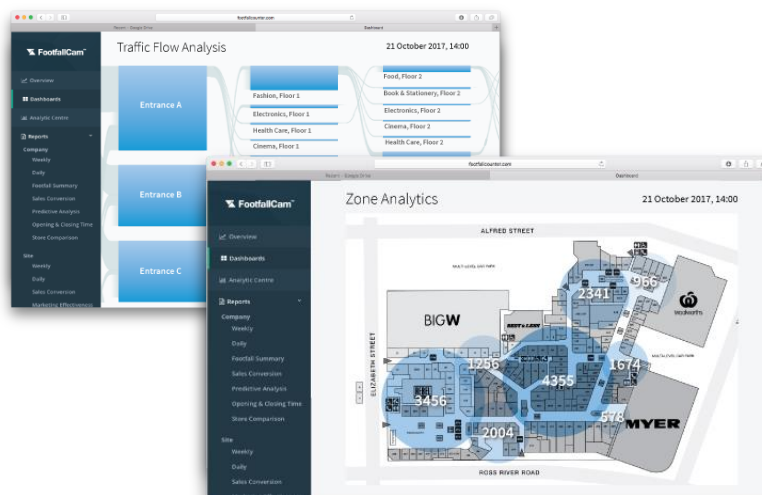

Different users may have different job responsibilities and need to use the FootfallCam Report Manger TM in different ways. Individual user accounts can be setup for your team member, and access rights assigned accordingly. Every user will be assigned a user ID and password, which they will be able to access from any networked location. System administrator will have remote access to the accounts information, modify access rights and disable any account when a team member leaves the company

Automate Email Scheduler

Reports can be scheduled to be sent to the key person (e.g. store manager for the store weekly reports, marketing manager for the campaign effectiveness reports, etc.) via email on a regular basis

API Available for Data Integration

API are available to import or export data to and from a system. FootfallCam is a fully embedded software module, intended for any environment where store footfall counting is required. Business intelligence (BI) system extracts and analyses footfall data (from FootfallCam central server) together with ePoS data (from retailer's ePoS system) to produce management report for corporate strategic planning

FootfallCam Analytic Manager V8™ Server Options:

	FootfallCam Cloud Server	Install at Client's Server
Descriptions	Software and data stored at FootfallCam hosted server. Retailer able to access via web browser with a secured password or login account.
